HELPFUL TIPS

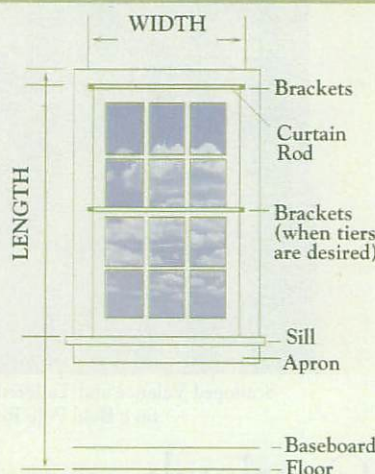

How to Measure Your Windows:

1. Using a metal tape measure, measure the width of each window, or the area you'd like to cover. Measure inside your window frame for inside-mount shades.
2. Measure the length from where your curtain rod will be placed to either the sill, apron, or floor (see diagram below).
3. Our curtain lengths are measured from either the top of the heading or the top of the rod pocket to the bottom edge of the curtain. Tab curtain lengths include tabs. Fringes or edging on curtains or dust ruffles must be added to the listed length.
4. Measure every window - window sizes can vary!
5. Record your measurements.

Up Shades: We recommend an outside mount for best coverage. The overall shade width is measured from bracket to bracket, with the shade fabric measuring 2" less than this measurement. When using an inside mount, shade hardware will adjust, allowing you to use a smaller shade for a slightly wider inside mount measurement.

Example...If your window has an inside measurement of 27 7/8" our 27" shade will accommodate an inside mount.

Rods and Hardware: All of our decorative rods measure from 3/8" diameter to 1 3/4" diameter and continental rods are designed to work perfectly in a 3" rod pocket. We offer several rods in smaller diameters to accommodate door and sidelight panels.
